ERRATUM

The value given for the preoperative mean spherical equivalent refraction in the abstract (page 123) of the following article, which appeared in the February 2008 issue of the Journal of Refractive Surgery, was incorrect. The corrected text follows below the citation.

RESULTS: The mean spherical equivalent refraction (MRSE) for all eyes changed from $+3.51 \pm 1.45$ D (range: $+0.50$ to $+6.63$ D) preoperatively to $+0.35 \pm 0.54$ D (range: $+1.63$ to $+2.00$ D) at 1 year.
