CNE Quiz: Barriers to Participation in an Online Nursing Journal Club at a Community Teaching Hospital

1. Traditionally, journal clubs were formatted to:
   A. Teach students and nurses about the research process.
   B. Educate students and nurses on evidence-based practices.
   C. Introduce students to the scientific method.
   D. Promote new research findings to seasoned nurses.

2. According to O’Nan (2011), a barrier of integrating nursing research into practice before the incorporation of a nursing journal club was:
   A. Isolation from knowledgeable colleagues.
   B. Research not applicable.
   C. Lack of motivation.
   D. Inability to change practice.

3. Sortedahl (2012) stated the outcome that incorporated an ONJC for school nurses revealed:
   A. Faster access to new evidence-based practice.
   B. Improved confidence in sharing evidence.
   C. Less reluctance to reading about other evidence-based practice journals.
   D. Increased participation in promoting evidence-based care at the bedside.

4. The study design was:
   A. Case-control.
   B. Cross-sectional.
   C. Survey.
   D. Interview.

5. The article category of most interest in reading to both groups (those who had and had not participated in an ONJC) was:
   A. Nursing practice.
   B. Medications.
   C. Treatments.
   D. Legal issues.

6. Those who had never participated in an ONJC indicated their greatest barrier as:
   A. Time.
   B. Technology.
   C. Accessibility.
   D. Motivation.

7. The preference of past participants of the ONJC for reading journal articles on paper was:
   A. 35%.
   B. 45%.
8. The percent of nurses who had not participated in the ONJC and also were not interested in reading nursing articles was:
   A. 2.2%.
   B. 7.3%.
   C. 12.4%.
   D. 18.3%.

9. Managers, colleagues, advanced practice nurses, and educators can urge participation in an ONJC by:
   A. Choosing simple articles.
   B. Making participation mandatory.
   C. Applying journal articles into practice.
   D. Strongly encouraging their staff.

10. A motivating factor for nurses to participate in a journal club was:
    A. Education.
    B. Peer pressure.
    C. Incentives.
    D. Promotion.
