ERRATUM

Errata for “Predicting Health Promotion and Quality of Life With Symptom Clusters and Social Supports Among Older Adults With Multiple Sclerosis”

The article “Predicting Health Promotion and Quality of Life With Symptom Clusters and Social Supports Among Older Adults With Multiple Sclerosis,” by Wenhui Zhang, BSN; Heather Becker, PhD; Alexa K. Stuifbergen, PhD, RN, FAAN; and Adama Brown, PhD, which was published in the October 2017 issue of the *Journal of Gerontological Nursing* (volume 43, number 10, pp. 27-36), has been amended to include factual corrections. Errors were identified subsequent to its original publication. One item on the PROMIS® Fatigue Scale was not reverse scored; therefore, certain values were slightly affected in Tables 2 and 3 and have been changed. In addition, two changes have been made to the text. On page 33, the following statement has been changed: R² for the final models ranged from 0.16 to 0.6. On page 34, the following statement has been changed: Although accounted for variance ranged from 0.16 to 0.6, all equations were statistically significant at p < 0.001. The online article and its erratum are considered the version of record.
