

Erratum

An error appeared in the Table on page 180 of the article, "Considerations in the Treatment of Geriatric Depression: Overview of Pharmacotherapeutic and Psychotherapeutic Treatment Interventions," by Carlos H. Rojas-Fernandez, PharmD; Lisa J. Miller, PharmD, BCPP, CGP; and Cheryl A. Sadowski, BSc (Pharm), PharmD, in the July 2010 issue (Vol. 3, No. 3, pp. 176-186). The starting dosage of fluoxetine (Prozac®) should be 10 mg daily.

The error has been corrected in the online version of the article. We apologize for this error.
