

2018 Reviewers

Each individual listed has donated time, effort, and thought toward reviewing manuscripts written by his or her colleagues. This is a labor of personal and academic dedication, as reviewers receive no pay or recognition for their efforts—except this simple listing. The peer-review process is an essential element in the veracity of papers published in the *Journal of Refractive Surgery*, an element that cannot be avoided, truncated, or subverted. The reviewers' comments help guide the editors in selecting articles for publication; we emphasize that it is the editors—not the reviewers—who make the final decision for publication or rejection. Much more than that, however, are the helpful comments reviewers make to assist authors in rewriting their papers.

Please note our Top, as well as Gold and Silver level, reviewers during the past year are listed separately. These reviewers are recognized for the quantity, quality, and timeliness of reviews they provide.
