

Erratum for “Anatomic Localization of Type 1 and Type 2 Macular Neovascularization Using Swept-Source OCT Angiography”

The article “Anatomic Localization of Type 1 and Type 2 Macular Neovascularization Using Swept-Source OCT Angiography” by Elie H. Motulsky, MD, PhD; Fang Zheng, MD; Yingying Shi, MD; Giovanni Gregori, PhD; and Philip J. Rosenfeld, MD, PhD, which was published in the November 2018 issue of *Ophthalmic Surgery, Lasers and Imaging Retina* (volume 49, number 11, pp. 878-886), has been amended to include a factual correction. An error was identified by the authors subsequent to its original publication. On page 885 of the article, the patient in Case 5 was stated to have a best-corrected visual acuity (BCVA) of 2/200 in the left eye; the BCVA should have been written as “20/200 in the left eye.” The online article and its erratum are considered the version of record.
