As the world of publishing has evolved, so has the mission of SLACK Incorporated, a family-owned company that has provided the medical community with award-winning information since 1923, and the publishers of ORTHOPEDICS. From the company’s start in print 90 years ago to its current roster of medical newspapers and 18 different Web sites, SLACK’s team now drives expert information to >9 million users each year.

In the next generation, ORTHOPEDICS readers will now have access to all of this valuable medical information at the new online home of all SLACK publications: www.Healio.com. This new online platform offers users clinical information from within their specialties and the specialties of their peers. Users will now have access to breaking news in all of the existing content areas SLACK provides, in addition to brand new content. The specialties you’ll find on Healio.com include:

- Adolescent Medicine
- Allergy and Immunology
- Dermatology
- Cardiology
- Endocrinology
- Gastroenterology
- Geriatric Medicine
- Hematology/Oncology
- Hepatology
- Infectious Disease
- Ophthalmology
- Optometry
- Orthopedics
- Orthotics and Prosthetics
- Pediatrics
- Psychiatry
- Rheumatology
- Sports Medicine
- Nursing

Healio.com will also feature onsite meeting coverage, blogs, video, and multimedia presentations, as well as editorials, columns, and perspectives from professionals at leading institutions. You’ll now have access to the full library of medical newspapers, books, peer-reviewed journals, and educational materials produced by SLACK Incorporated.

Once you’re done reading the latest news, studies, and clinical trials, the Healio.com Education Lab will allow you to participate in CME and other educational activities online, so you can fulfill your education requirements. Healio.com users will also have access to SLACK’s reference series, Curbside Consultations, which is renowned for answering the compelling questions that physicians face in practice and provides detailed answers that physicians, nurses, and other health care personnel can reference easily for their patients.

**Personalized Content**

You’ll be able to register your preferences in all of the topics that you want to know about, and the site will deliver material directly to you through personally selected newswires and preferences. If you’re an orthopedic surgeon whose practice is based on performing joint reconstruction, you can personalize your content delivery to receive the latest headlines on procedures and research in your field. By delivering content that is most meaningful to you, you’ll have the resources you need to be able to choose when, and if, to put your knowledge into practice.

**Creating a Conversation**

On Healio.com, registered users will have the opportunity to comment and to lend their perspectives. You can also share and “like” the stories that are important to you with your colleagues through e-mail, Facebook, Twitter, LinkedIn, and Digg, creating conversations that help provide the highest quality of care to your patients.

The publishers of ORTHOPEDICS and I are proud to bring this expanded application of information to our valued readers. Bookmark www.Healio.com/Orthopedics on all of your devices now so that you can continue to navigate the latest technology and research ORTHOPEDICS has to offer.

Dr D’Ambrosia is Editor-in-Chief, ORTHOPEDICS.

NEWS
You will still find the daily news coverage of orthopedics you have grown to rely upon.

NAVIGATE BY SUBSPECIALTY
Your information needs are unique. You can select and tailor news and education to fit your daily practice.

ACCESS MULTIPLE SPECIALTIES
The convergence of medicine has brought to the forefront the need for news and education beyond one’s own specialty. Healio.com offers users a rich, deep content experience in 18 medical specialties.

TOPIC AREAS
We know you need more than just news. At Healio.com, you will also find: blogs by peer experts; educational activities; peer-reviewed journal articles, a reference Q&A feature called Curbside Consultation; book line; and a robust meetings and courses listing.

EDUCATION LAB/CME
As a one-stop resource for specialty-specific education and quality content, you can access educational activities that offer you an opportunity to learn about a focused topic and earn CME credits, track your progress, and print certificates.

VIDEO
Thousands of videos – from surgical techniques to expert interviews.

BLOGS
Top minds weigh in on the most pressing topics in their field.

JOURNALS
Peer-reviewed, original science and clinical studies from SLACK Incorporated.

CURBSIDE CONSULTATION
Expert answers to the most frequently asked questions by subspecialty.

BOOKS
SLACK Incorporated’s Professional Book Division presents high-quality material in medical and health professions textbooks for the classroom and for reference and continuing education for the clinician or practitioner.

MEETINGS
Find an upcoming meeting. Or catch up on ORTHOPEDICS’ recent meeting news coverage. If it happens in your specialty, you can find it here.
