Retraction: “Pain Management After Total Knee Arthroplasty Using a Multimodal Approach”

This article has been retracted at the request of the authors.

We would like to formally request that the article entitled, “Pain Management After Total Knee Arthroplasty Using a Multimodal Approach,” by Morteza Meftah, MD, Anthony C. Wong, BSc, Danyal H. Nawabi, MD, FRCS(Orth), Richard J. Yun, MA, Amar S. Ranawat, MD, and Chitranjan S. Ranawat, MD (volume 35, number 5, pp. e660-e664; doi: 10.3928/01477447-20120426-19), be retracted.

This is because the data were published prematurely and the authors did not have the proper permission from the combined Hospital for Special Surgery work study group. The data have been fully reported in the following publication: “Analgesia After Total Knee Replacement: Local Infiltration Versus Epidural Combined With a Femoral Nerve Blockade. A Prospective, Randomized Pragmatic Trial,” by J. T. YaDeau, E. A. Goytizolo, D. E. Padgett, S. S. Liu, D. J. Mayman, A. S. Ranawat, M. C. Rade, and G. H. Westrich, The Bone & Joint Journal (volume 95-B, number 5, pp. 629-635; doi:10.1302/0301-620X.95B5.30406).
