ORTHOPEDICS heartily thanks the following individuals for their time and effort in reviewing manuscripts. Each submitted manuscript is reviewed by at least 2 of these dedicated individuals. Their comments to the editor are helpful when determining whether to accept manuscripts, but the reviewers serve an even more important function by providing comments and suggestions to authors on how to improve the quality of their manuscripts so that they are worthy of publication in ORTHOPEDICS.

Please note our top 10 reviewers for the past year are indicated in the list with an asterisk. These reviewers are recognized for the quantity, quality, and timeliness of reviews they provide.
